WELL PROVEN SINCE DECADES

DOMETIC REFRIGERATORS AND SAFES FOR HEALTH AND CARE FACILITIES

Dometic is a leading manufacturer of cooling appliances for special applications – with decades of experience in the healthcare sector. Our reference list includes hospitals, retirement and nursing homes, doctor's surgeries, pharmacies and laboratories.

Dometic Medical and Food Line refrigerators have been proven thousands of times over, across Europe and beyond. They are among the most compact of their kind available in the market.

With its proSafe and SafeLock ranges, Dometic also provides reliable solutions for secure storage of the patients' or residents' valuables.

All products for the healthcare sector are manufactured to stringent quality and environmental standards in Dometic's own, certified factories. Our sales and service network spans almost 100 countries and provides personal support to customers and planners on all continents.

RESPONSIBILITY FOR THE ENVIRONMENT

At Dometic, thinking and acting ecologically is an all-embracing process that extends to all levels – from the design of resource-saving, energy-efficient products to sustainable production processes and special recycling measures. You can be 100% sure that all applicable regulations, directives and guidelines are fulfilled.

CERTIFIED QUALITY

- All Dometic production plants are certified according to ISO 9001 and ISO 14001 as well as the Eco-Management and Audit Scheme.
- Dometic is an EMAS-certified company. All environmental results are published in Dometic Environmental Product Declarations.
- All products fulfil the requirements of the European Union's ROHS directive.

Dometic's certified production facility at Jászberény, Hungary

DOMETIC PRODUCTS ADD VALUE

FOR HOSPITALS, RETIREMENT HOMES, SURGERIES AND PHARMACIES

HOSPITALS & CLINICS

Having their own Food Line fridge and proSafe in the room gives patients more comfort and convenience. They are less dependent on staff for drinks and food and can rest assured that their valuables are safely stored. This, in turn, relieves the staff and cuts operating costs. Hotel-like amenities can also help hospitals and clinics stand out from their competitors.

Medical refrigerators on the station floor provide easy access to daily medications and common prescriptions, which means shorter distances to go for the hospital staff.

Product examples: DS 400, HC 302 DIN, DS 301 H and MD 363

RETIREMENT HOMES

Dometic Food Line refrigerators take up very little space and offer a great deal of comfort. They make the residents feel more at home, and more independent too. This relieves the nursing staff and gives them more time for other tasks.

Dometic medical refrigerators provide safe storage for temperature-sensitive pharmaceuticals and fast access to "daily essentials".

Product examples: DS 400, HC 302 DIN and MD 363

SURGERIES AND PHARMACIES

Dometic medical refrigerators keep smaller amounts of temperature-sensitive pharmaceuticals, preparations and vaccines close at hand for immediate access.

They provide safe storage of the precious content at a temperature between +2°C and +8°C. The well organised, illuminated interior with practical drawers and compartments makes for easy handling.

Product examples: HC 302 DIN, HC 502 DIN and DS 601 H

& FOOD

The ideal solution for storing heat-sensitive medicine safely at a temperature between +2°C and +8°C. Practical drawers enable you to keep the medicine arranged and grouped clearly. A digital thermometer monitors the internal temperature and stores the highest and lowest temperature for a defined control period.

You can choose between two series with different cooling technologies and quality features:

HC series with powerful, energy saving compressor technology: with integrated temperature display and high-quality, roller based metal drawers (3/4 extension) with plastic front

DS series with noiseless absorption cooling: for normal ambient temperatures, fitted with an external thermometer and plastic drawers (1/2 extension) with transparent front

QUALITY FEATURES

- Constant cooling performance between +2°C and +8°C
- DIN certified medical refrigerators
- High-quality metal drawer with telescopic slides
- Digital temperature display with memory function
- Audible alarm functions
- Lock included

WHY USE SPECIAL MEDICAL REFRIGERATORS?

Improper medicine storage can not only cause severe damage. In the worst case, it can also have bad consequences on the patient's health, because the drugs can become ineffective. Therefore, pharmaceuticals and preparations that require cooling (e.g. insulin, vaccines or heparin products) have to be properly stored at temperatures between 2°C and 8°C. Quite often, conventional household refrigerators are used for the purpose, although they are absolutely unsuitable. Household fridges are unable to maintain a constant temperature level inside. Moreover, they have fully automatic defrosting cycles, and the temperature can rise to over 10°C during the defrosting phases. Also, it is impossible to check, document and store the temperature data.

HC SERIES DIN MEDICAL REFRIGERATORS

EXCELLENT STORAGE CONDITIONS FOR HIGHEST DEMANDS

Medical refrigerators have to meet the very highest demands, and they have to be absolutely reliable. To be on the safe side, use a device that complies with the DIN 58345 standard for pharmaceutical refrigerators, because it will meet the demands on professional storage to the full extent. In addition to standard features like temperature setting, recirculation cooling and a safety lock, DIN compliant devices also provide a visual and audible warning function in case of temperature deviations. Thanks to an integrated battery the warning function (visual + audible) will even be maintained for at least 12 hours if the power supply fails. On top of that, DIN refrigerators are fitted with a potential free contact for alarm transmission.

HC SERIES MEDICAL REFRIGERATORS

THE ECONOMICAL SOLUTION

Based on efficient compressor cooling, HC series medical refrigerators are amazingly powerful and energy-saving. Moreover, the models in the HC series are fitted with some useful extra features. High-quality, roller based metal drawers with 3/4 extension allow for convenient handling in everyday use, and the thermometer is integrated in the door.

NOISELESS COOLING COMFORT

DOMETIC FOOD LINE REFRIGERATORS

Maintenance
free absorption
cooling
technology

Chilled drinks and food right at your fingertips all the time. Dometic Food Line refrigerators give patients or residents more comfort, privacy and independence. Compact and based on noiseless absorption cooling they can be placed in the room as required, even at the bedside. As the only cooling appliances in their class world-wide, the Dometic refrigerators are suitable for fresh food too. They reliably maintain a cooling temperature of 4°C at ambient temperatures up to 32°C.

QUALITY FEATURES

- Noiseless absorption cooling – can be placed at the bedside
- Compact, space-saving design – fits where an ordinary fridge won't
- Suitable for fresh food
- Practical options: lock, sliding hinge

Ventilation of the cooling unit

To ensure optimum cooling performance with minimum energy consumption, several basic principles need to be followed when installing an absorption miniBar. The heat which the cooling unit extract from the refrigerator interior is emitted at the back of the miniBar.

When installing the miniBar, ensure that it is standing on a stable and horizontal surface, and not directly near a heat source.

SAFETY &

SECURITY

FOR SECURE STORAGE OF VALUABLES

DOMETIC PROSAFE AND SAFELOCK

Latest surveys in hospitals have shown that more than 80% of patients would like to have their belongings safe. Dometic safes and furniture locks give patients and residents the peace of mind knowing that their money, documents, watches, jewellery and other valuables are safely stored. This also means one thing less to worry for hospitals or nursing staff – and no liability discussions in case of loss or theft.

The Dometic proSafe range offers a choice of four models in different sizes, all featuring a contemporary design with rounded corners and edges for enhanced safety. Dometic SafeLock converts an existing furniture into a spacious safety compartment.

QUALITY FEATURES

- Laser cut doors with minimal clearance for top security
- Intuitive, user-friendly operation
- Motorised locking system with automatic opening
- Emergency opening via master key or master code
- For retrofitting into existing furniture

Dometic presents SafeLock, a new addition to its existing Safe Range. This innovative solution can convert existing, unused or built in furniture into a lockable compartment for larger items. Using a 4 digit personal security code and a LED display the SafeLock uses the same tried and tested technology from the Dometic safe range. The Dometic SafeLock is easy to install, and ideal for storing computer cases, rucksacks or any larger items. With a slim design and a motorised locking system the SafeLock offers convenience, maximum security and peace of mind to residents or patients. The SafeLock can be opened in an emergency using the Master Code and Master Key and has optional features like Remote Emergency Opening System (REOS Code) through Safe Management (SAM) and the possibility to audit the last 1000 events with the Premium Audit System.

QUALITY FEATURES

- Intuitive, user-friendly operation
- Motorised locking system with automatic opening
- Emergency opening via master key or master code
- Electronic door locks for retrofitting into existing furniture – ideal for larger items

Dometic is a global company that makes mobile living easy – by providing great solutions to satisfy people’s essential needs when they are on the move. Like cooking, taking care of personal hygiene and maintaining a pleasant temperature. We offer smart and reliable products with outstanding design.
